Institutions

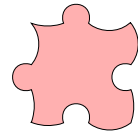

Actively cooperating institutions:

- Central Bank of Slovenia
- Tax administration Office
- Ministry of Finance
- Ministry of Public Administration
- Bank Association of Slovenia
- Small Business Development Centre
- Statistical Office of Slovenia

Working group for content of B2B standards

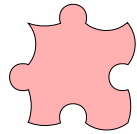

Working group for content of B2B standards

The main task of WG was to prepare content and documentation for standard documents in XML format needed for operations between enterprises: order, despatch advice and invoice and to train the project members for their usage.

Results:

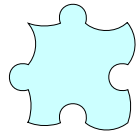

- complex invoice
- simple invoice
- complex order
- simple order
- order confirmation
- despatch advice
- control document
- training for standards usage

Working group for content of B2B standards

Cooperation with Tax Administration Office

- Tax-Office verification of complex and simple invoice
- Tools for Tax-Office inspectors
- Tax Office inspectors training

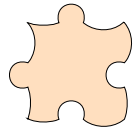

Working group for Payment Standards

Basic goal of this WG was to standardize payment system between companies, banks and public institutions. The main task of WG was to prepare content and documentation for standard XML payment documents.

Results:

- payment order
- payment cancellation
- credit advice
- debit advice
- banking status
- financial statement

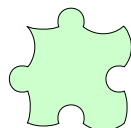

Working group for Technological Solutions

The main task of WG was to prepare range of recommended technological solutions for e-connecting, provides technological support for other WG and performs training for project members.

Results:

- Reference book of possible technological solutions:
 - when connecting complex homogeneous environments
 - when connecting complex heterogeneous environments
 - when connecting simple environments
- Recommendations for e-commerce service providers
- Contract template between enterprise and service provider

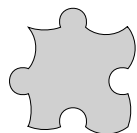

Working group for Electronic Signature

The main task of WG was to prepare guidelines for implementation of digital certificates in company, instructions for electronic archiving and to take steps for establishment of unified digital certificates system.

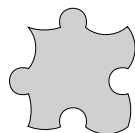

Results:

- Instructions for using digital certificates
- Security requirements for applications when using digital certificates
- Manual – How to use electronic signature in the company
- Tool kit for verifying software solutions
- Instructions for electronic archiving

- e-Taxes project (Tax Administration Office)
- e-CORE project (Statistical Office)
- CBRGD Phare project e-SLOG for SME's

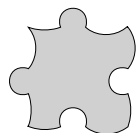

Collaboration with other projects

CBRGD Phare project "e-SLOG for SME's"

Introduction of e-commerce model and standards for order, despatch advice and invoice in cross-border trade between SMEs in Slovenia and Austria.

- Location:
 - Slovenia: CBC region
 - Austria: Interreg IIIb and Steiermark, Graz
 - Slovakia: Nitra region
- Partners:
 - GZS WK Stmk
 - e-SLOG Nitra SK
 - FERl

Current situation in slovenia

- Mass usage of e-SLOG invoice
- Slovenia ranked 9. in Europe in the number of e-invoices
- e-invoice is used by all companies with mass invoicing
- E-Slog standards are integrated in majority of ERP systems
- Starting of project e-SLOG2

Project information, standards
